

Upper 3 geographers complete rainforest escape room

Our Upper 3 geographers have recently started learning about tropical rainforests with our introductory lesson looking at where this global biome is located.

This week, members of U3Y completed an escape room where they had to work in groups to complete a series of challenges.

Each challenge that was completed successfully led to them receiving a code which unlocked a padlock on a series of ever decreasing boxes until they finally received their prize.

It was a mad dash from start to finish with everyone really getting into each challenge, especially as the clock got closer to the end of their time!

All three teams successfully completed their challenge though, showing the effectiveness of listening to each other, supporting one another, collaborative learning and above all, having a lot of fun!
