Little scientists

For Science Week, our little scientists have been watching, learning and carrying out a range of science experiments. We have watched rainbows form from skittles, gummy sweets grow in size and seeds change into soggy little balls!

The children watched Mrs Drake make some jelly (before having a taste) then had fun playing with the jelly. Mrs Roth and her helpers made slime.

Our other experiments included car racing, practising using pipettes, doing colour mixing exercises and making amazing models using magnetic shapes.
