

## Magical maths in Upper 1

This week, we have been learning how to measure in litres and millilitres, comparing volume and capacity, looking at equivalent volumes and how to add and subtract them. We have made our learning fun and magical by measuring out different ingredients to make a 300ml potion. The children could choose from Deadly Nightshade, Snake Venom, Fairy Dust, Genie Vapor, Mermaid Tears and Liquid Sunshine! They worked carefully to pour out a chosen amount of each ingredient into a measuring jug before adding it to their potion, making sure they were choosing volumes equivalent to 300ml.

Well done Upper 1!

Miss Beth Adamson, Ms Kate Stewart and Mrs Alex Arundale
