

## Upper 4 art – steampunk

In lessons Upper 4 have been exploring the work of steampunk artist Vladimir Gvozdev who combines insects and animals with functional machinery. They have gridded up their drawings to draw the outline free hand and filled them in with their own mechanical designs, emulating the artists steampunk style. They have then used high contrast tonal shading to create a metallic effect.

As part of their homework, they have researched the artist and created a page all about him.

Great work Upper 4!

Mrs Della Harrison
