SCHOOL

### Life cycles

The children have had a wonderful week recapping the life cycle of the caterpillars, the ducklings and human babies. We received a special package this week containing lots of very wriggly caterpillars. The children helped distribute their food into jars and watched as we rehomed them. They have grown so much over the week, it is magical!

We also found a range of bugs and creatures, which the children enjoyed watching, as they played in our creature basket.

Have a super half term!

Mrs Santosh Roth
