

## Lifecycles in Lower 1!

In science this half term, Lower 1 are learning all about lifecycles. Fortunately we've had some interesting visitors to the classroom to help us with this. We have a tank full of tadpoles, allowing the children to closely observe the lifecycles of an amphibian. Not much has happened yet, but they all seem to present and correct and we're chalking that up as a win!

Transition have had their annual delivery of duck eggs. The eggs were really eager to hatch this year, so Lower 1 have already been able to meet our first three ducklings. By next week the ducklings should be big and strong enough to enjoy a little swim – we can't wait!

Miss Beth Hayter and Mrs Charlotte Slater
