Pre-Reception learn about lifecycles

This week in Pre-Reception, we have been exploring the fascinating lifecycles of different animals. Our wow word was 'hatch', and the children were especially excited to observe ducklings as they began to hatch out of their eggs. It was a magical experience for them to see the tiny beaks pecking through the shells and to talk about how baby animals grow and change.

We also spent time learning about the transformation of tadpoles into frogs. The children were curious and engaged as we discussed each stage of the frog's lifecycle, from eggs to tadpoles and finally to adult frogs. It has been a wonderful week full of discovery and hands-on learning about the natural world.

Have a lovely weekend.

Miss Gemma Logan
