### Number challenges to 20

Over the next few weeks, we will be exploring numbers to 20 through fun, hands-on challenges. This week, the children have enjoyed using wooden blocks to build towers with exactly 20 bricks. They practised their mental maths skills by calculating how many bricks they had used and how many were left to make a full set of 20.

We also took our learning outside and created a giant number path using chalk. The children rolled a dice and moved along the path, practising their counting-on skills whilst staying active and having fun. It's been a great week of practical maths and teamwork!
