SCHOOL

### Buzzing around in the sun

The sun has been shining all week and the children have had a wonderful time. We have been exploring the school grounds in search of new growth, bugs and discussing the life cycles. The children picked dandelion seeds and blew them, so the seeds would grow again.

We have been looking at the home of bees and watched them go in and out of their nests. We discussed how bees visit flowers and then come home to make delicious honey. The children enjoyed spreading honey on a slice of bread and eating it too!
