

Upper 1 visit Harlow Carr Gardens

The children in Upper 1 enjoyed a fantastic day at Harlow Carr Gardens in Harrogate to enhance their science work on plants. They took part in a workshop which involved identifying parts of a flowering plant, investigating methods of seed dispersal and identifying different plant species.

They also did a little gardening of their own and planted some salad leaves to bring home and look after. After a picnic lunch, we enjoyed a scavenger hunt around the gardens and a play in the woodland treehouse. Luckily, the sun was smiling on us all day too!

Ms Kate Stewart and Miss Beth Adamson
