Reception learn about maths...with sweets

This week in mathematics we have been exploring sharing and grouping. Using a variety of different sweets we talked about how we might count, group and then share them. The children were very eager to give their ideas on organising the sweets and they worked together to complete the task. After successfully grouping the items, we discussed how we could share out items between 2 people and then how we could share them with the whole class. There were lots of rich discussions on how to ensure it was fair and what we would do with any spare sweets!
