

Enrichment Week – Tuesday

Upper 4 - Adrenalin

Our Upper 4 pupils enjoyed an exciting visit to Adrenalin on Tuesday, where teamwork was at the heart of every challenge. They began on the high ropes course, working together to reach the highest point possible while overcoming fears of heights. Encouragement, communication and determination were on display throughout, with everyone supporting one another to step outside their comfort zones.

After a well-earned lunch break, the pupils tackled the thrilling Krypton Factor obstacle course in three teams. Climbing over, crawling under and swinging across a variety of obstacles, they raced against both each other and the clock. It was a fantastic display of resilience, cooperation and competitive spirit, with Team 2 emerging as the overall champions. The day was a brilliant opportunity to build confidence, strengthen friendships and celebrate the power of teamwork.

High School & Sixth Form

Upper 3 & Lower 4 - CSI

All of Lower 4 enjoyed a full day of working out who stole the House School cup at Waygates School. Pupils enjoyed using forensic techniques, scientific reasons skills and problem-solving skills as they worked their way through 4 big challenges to put the pieces of the puzzle together. As each puzzle was completed, the pupils were still never quite sure which of the members of staff it could be - was it Miss Sisterton, Mr Deeves or someone else? It was frustratingly never clear cut as evidence could link to various suspects, however, we were overwhelmingly impressed that each house group manage to find overwhelming evidence in the end to eliminate a large number of staff, with very good analyses of motive and crime time placement, to come to the final conclusion that a certain Mr Josh Brosky was actual the culprit! Well done Lower 4 you worked brilliantly as a team and presented some amazing evidence.

Lower 5 - presenting yourself

Lower 5 pulled out all the stops to present their eye-catching and informative career stands and PowerPoints in the *Selling your Sector* activity. Pupils selected a favourite career sector and set about researching roles, qualifications, salaries, skills, employment trends and the crucial impact of AI. Teamwork was excellent and the finished stands were unique and professional.

Lower 5 also presented themselves enthusiastically and thoughtfully for interview practice in the high-pressure speed-interviewing activity. Pairs of pupils visited each interviewing table for 6 minutes ready to answer questions about their hobbies, strengths and weaknesses and even what they would change if they were prime minister! It was great to see all the pupils in a different light and to have a glimpse of the capable and articulate young adults that they are soon to become.
